ALL CROPS

# VITALITY®

## FOLIAR BIOSTIMULANT

### TARGET CROPS

**VITALITY®** is a vitality booster based on a kelp concentrate rich in active ingredients. It strengthens plant tissues, maintains cell homeostasis, stimulates vitality and acts as an anti-stress barrier. The result is secure harvests, even under stress during the crop cycle.

### ADVANTAGES

- Laminaria is a type of brown algae. The extraction method preserves and secures a high content of active elements, which play an important role in plant physiology and growth.
- Silica is an essential element in plant nutrition. It helps combat abiotic stresses, notably by strengthening plant tissues.
- Salicylic acid, an organic element, is involved in cell growth, in the acquired systemic defense of plants, and is a genuine vitality stimulator.
- Glucans are polysaccharides, a component of cellulose, which improve the rigidity of plant cells.

\*For details and precautions for use, refer to the label.

### PROFITS

**Efficiency**  
Increased crop yield and quality

**Innovation**  
100% preserved active ingredients

**Simple**  
Stable liquid formulation

**Natural**  
UOF

### APPLICATION

Foliar application throughout the crop cycle.  
Up to 5 applications of 1 to 2L/ha depending on the crop.

### COMPOSITION

**Seaweed complex - Laminaria concentrate**

5% Sulfur dioxide ( $\text{SO}_2$ )

0.5% Potassium oxide ( $\text{K}_2\text{O}$ )

2% Silica ( $\text{SiO}_2$ )

0.3% Molybdenum

0.76% Amino acids / pH: 6-7 / Density: 1 +/- 0.05

### PACKAGING

**Cans : 5L, 10L, 22L**

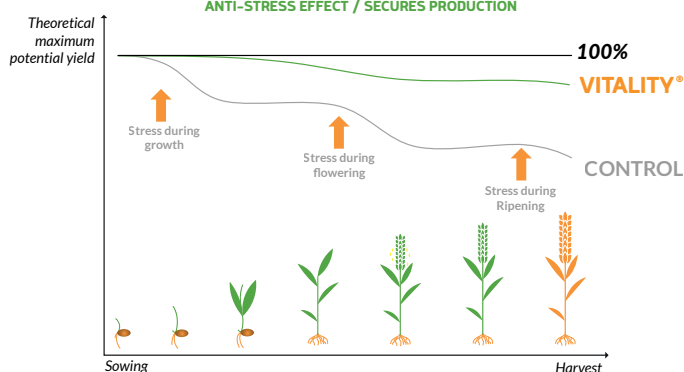

Formulation : **SC (Concentrate Suspension)**
