ATTRACT & KILL

MANGO / AVOCADO

BACTROCERA BLOCK®

ATTRACT & KILL

REGISTERED CROPS

BACTROCERA BLOCK® is an Attract & Kill solution designed to control the *Bactrocera dorsalis* (oriental fruit fly), *Bactrocera latifrons* (chili fruit fly) and *Bactrocera zonata* (peach fruit) highly destructive pests. This solution features a combination of a Container Trap and a wooden block impregnated with a male-specific pheromone, combined with an insecticide. By attracting and eliminating males, the system reduces the population before egg-laying, limiting fruit damage and economic losses.

ADVANTAGES

- Targeted action on male flies
- Safe for beneficial insects
- Low environmental impact
- User-friendly and requires no special equipment
- Easy installation & low maintenance
- Continuous & long-lasting protection (up to 8 weeks)
- A crop free of pesticide residues

USAGE & DOSAGE

Use 4 traps per ha for Monitoring and 20 traps per ha for mass disruption.

*For details and usage precautions, refer to the label

Wear gloves and a mask to handle the product. Do not leave it within reach of children.

COMPOSITION

Methyl Eugenol & Malathion

BENEFITS

Ease of use

No equipment required

High persistence

Effective bioinsecticide

Targeted control

Attracts only male fruit flies

Natural

Zero residues.

Methyl-Eugenol: sexual attractant for males of 3 *Bactrocera* species: *Bactrocera dorsalis* (oriental Fruit Fly), *Bactrocera latifron* (Chili Fruit Fly) and *Bactrocera Zonata* (Peach Fruit Fly)

Attract

Malathion: neurotoxic contact insecticide with knock-down effect. It kills fruit flies after vaporous inhalation or ingestion

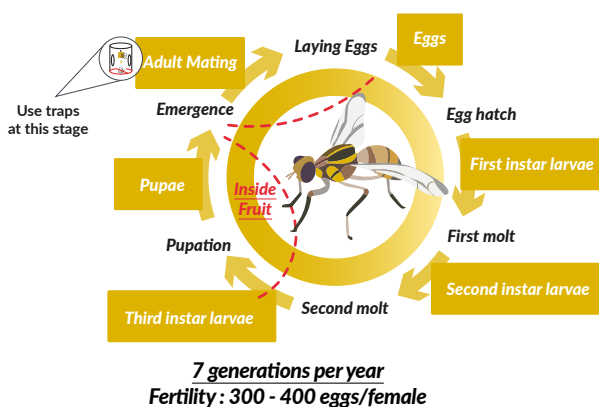

Kill

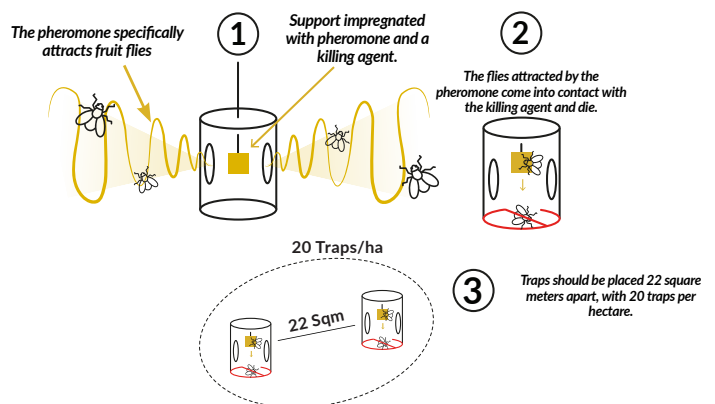

***Malathion* is a neurotoxic insecticide that kills fruit flies, while *Methyl-Eugenol* attracts male *Bactrocera* fruit flies effectively.
