MALE -X FCM®

BIOCONTROL

CROPS

MALE -X FCM® is an innovative biocontrol solution specifically designed to target the False Codling Moths (F.C.M). **MALE -X FCM®** composition is a unique blend of species specific sex pheromone, combined with a contact insecticide in a slow release paste-like matrix. The **MALE -X FCM®** formulation is applied as small droplets to branches or leaves without touching the edible parts of the crop. The droplets mimics a female moth's mating signal. Males attracted to the droplets come into contact with the insecticide and die within minutes, preventing mating and reducing the pest population. The droplet releases a constant amount of pheromone over a 6-week period, during which time it can be visited by multiple males.

ADVANTAGES

- Resistance Management: Reduces reliance on conventional pesticides, helping to prevent resistance development.
- Safe for beneficial insects
- Highly Efficient: Application allows massive numbers of droplets, increasing kill points and effectiveness.
- Cycle Disruption: Targets adult moths, disrupting the reproductive cycle for long-term control.
- Smart Application: Effective in areas difficult to spray, such as hidden or nocturnal activity zones.
- Crop Quality: Ensures high-quality produce with no chemical residues on fruits.

BENEFITS

Non-Phytotoxic
Safe for crops/fruits

Eco-friendly
Lowers ecological disruption

Cost effective
Easy mode of application

Doesn't kill Beneficial Insects

CROP	APPLICATION		HOW TO APPLY
Roses	1 Tube per Ha	3 Times Interval In 7 Days	Apply the droplet in the top third of the tree for maximum exposure
Avocado	1 Tube	6 Weeks	
3,000 Droplets - 1 Tube			

FIELD CROPS

- Male -X FCM™ is rain-fast and can be applied during wet conditions or even under a centre pivot irrigation system, saving reapplication costs.
- Male -X FCM™ does not drift in the wind during application, as with conventional chemicals, allowing the crop to stay insecticide free.
- Male -X FCM™ delivers long-lasting effectiveness with a single application, providing control for up to 6 weeks and saving you valuable time.

PACKAGING

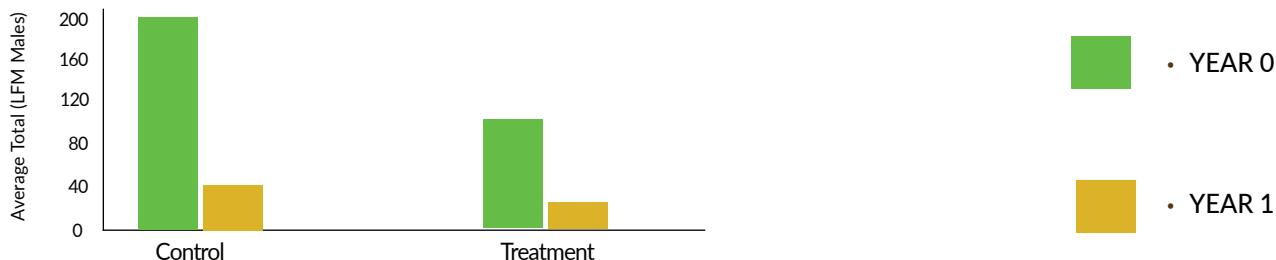

250 mL

Formulation : **Paste mix dispensed in a slow release**
