MACADAMIA

250 ml

MALE -X MNB®

BIOCONTROL

CROPS

MALE -X MNB® is an attract -and-kill grease formulation containing pheromone and an insecticide. Male macadamia nut borer moths (*Thaumatotibia bactrochopa*) are attracted to the formulation and killed by a lethal dose of insecticide on contact.

ADVANTAGES

- Targeted Pest Control: The pheromone specifically attracts the target pest species, ensuring effective control without affecting non-target organisms.
- Safe for beneficial insects
- Environmentally Friendly: It uses minimal insecticide, reducing environmental impact and leaving no harmful residues on crops.
- Reduced Chemical Use: By attracting pests to a small amount of insecticide, it minimizes the overall use of chemicals in pest management.
- Application is safe for workers, requiring no protective clothing and allowing immediate re-entry into treated areas.

*For details and usage precautions, refer to the label

Wear gloves and a mask to handle the product. Do not leave it within reach of children.

BENEFITS

Residue free

No risk to consumers

Long lasting

Effective for upto 6 weeks

Water resistant

Used in wet conditions

Hinder resistance

Targets only adult males

CROPS	APPLICATION	HOW TO APPLY
Potato	50 uL droplets- 150g/ha	To calculate droplet spacing, the number of trees per hectare should be divided by the number of droplets per hectare
Mango	50 uL droplets- 150g/ha	
Macadamia	50 uL droplets- 150g/ha	

COMPOSITION

Ingredients	Amount
Deltamethrin	60 g/Kg
(Z)-8-dodecen 1-yl-acetate	1.6g /Kg

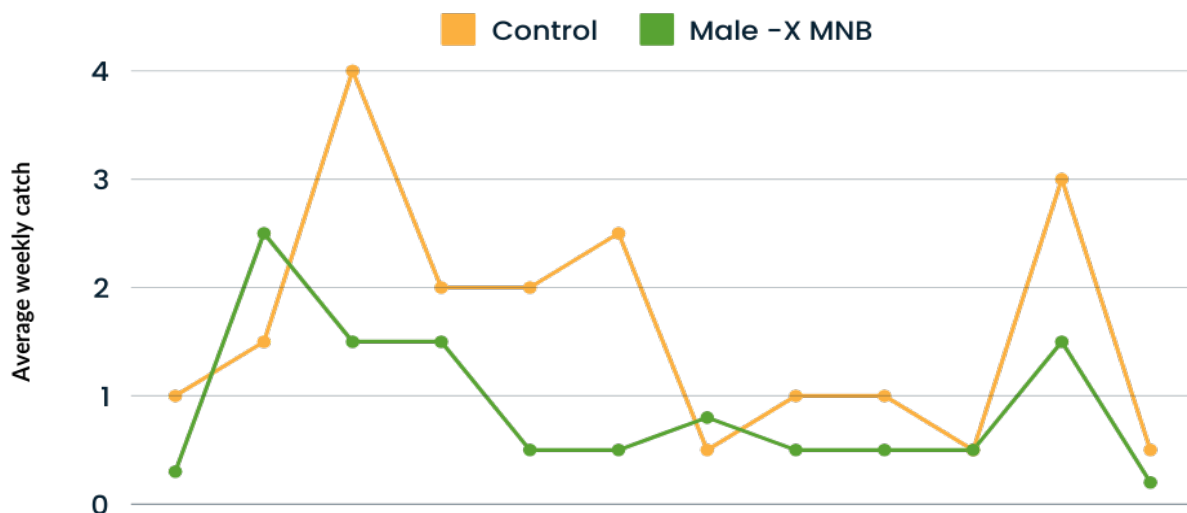

PACKAGING

250 mL

Formulation : **Paste mix dispensed in a slow release**

MORE INFORMATION

Efficacy of Male -X MNB
Weekly moth catch, with Male -X MNB applied every 28 days.
